DETAILED ACTION

Claims 1-12 are pending in the instant application.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to (i) a protein, peptide, or peptide mimetic having a sequence comprising 10 consecutive amino acids encoded by SEQ ID NO: 2 or by a polynucleotide that hybridizes to the complement of SEQ ID NO: 1, having the recited deletions and (ii) a method of inhibiting telomerase catalytic activity using the same, classified in class 530, subclass 350.
- II. Claims 1-12, drawn to (i) a protein, peptide, or peptide mimetic consisting essentially of SEQ ID NO: 3 and (ii) a method of inhibiting telomerase catalytic activity using the same, classified in class 530, subclass 350.
- III. Claims 1-12, drawn to (i) a protein, peptide, or peptide mimetic consisting essentially of SEQ ID NO: 5 and (ii) a method of inhibiting telomerase catalytic activity using the same, classified in class 530, subclass 350.
- IV. Claims 1-12, drawn to (i) a protein, peptide, or peptide mimetic consisting essentially of at least 10 consecutive amino acids from SEQ ID NO: 4 and (ii) a method of inhibiting telomerase catalytic activity using the same, classified in class 530, subclass 350.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV represent distinct inventions drawn to different and distinct sequences which do not render obvious each other and thus are patentably distinct. Restriction to examination of a single

Art Unit: 1632

sequence is due to the now very high and undue burden for examining more than one sequence, which is caused by the continued exponential increase in size of the sequence databases to be searched for each sequence, resulting in a corresponding increase in computer search time and examiner time for reviewing the computer search results. Therefore, the limited resources of the Office no longer permit examination of more than one sequence in an application.

Because these inventions are distinct and because the searches required for the separate inventions are not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
